Exercises for LAB 4 Deadline: 21/03/2016, 16:00.
Only handwritten solutions will be accepted!

- Write an anonymous block to ask Student Number from the user and display the Name of the student on the screen.

- Write an anonymous block to ask a Student Number from the user and display the total number of course the student got “A” on the screen.

- Write an anonymous block that displays the number of orders placed by a particular customer. The customer id must be read from the keyboard. (For example customer with Customer#=1010 has placed 2 orders.)

- Write an anonymous block to change ID of a publisher. Consider that the publisher id must be changed in both “Publisher” and “Books” tables. At the end display the number of changed records on the screen.
